

Publicaciones recogidas dentro de la línea de investigación “Álgebra no conmutativa” del Programa de Doctorado en Matemáticas por la Universidad de Almería, la Universidad de Cádiz, la Universidad de Granada, la Universidad de Jaén y la Universidad de Málaga durante el período 2013-2018

1. E. Pardo, Dilations and full corners on fractional skew monoid rings, *Publ. Mat.* 58(1) (2014), 155-177.
2. E. Ortega, E. Pardo, Purely infinite crossed products by endomorphisms, *J. Math. Anal. Appl.* 412 (2014), 466-477.
3. P. Ara, E. Pardo, Towards a K-theoretic characterization of graded isomorphisms between Leavitt path algebras, *J. K-Theory* 14(2) (2014), 203-245.
4. R. Exel, E. Pardo, The tight groupoid of an inverse semigroup, *Semigroup Forum* 92 (2016), 274-303.
5. P. Ara, E. Pardo, Primely generated refinement monoids, *Israel J. Math.* 214 (2016), 379-419.
6. R. Exel, E. Pardo, Self-similar graphs, a unified treatment of Katsura and Nekrashevych  $C^*$ -algebras, *Adv. Math.* 306 (2017), 1046-1129.
7. T.M. Carlsen, E. Ortega, E. Pardo,  $C^*$ -algebras associated to Boolean dynamical systems, *J. Math. Anal. Appl.* 450 (2017), 727-768.
8. P. Ara, E. Pardo, Representing finitely generated refinement monoids as graph monoids, *J. Algebra* 480 (2017), 79-123.
9. L.O. Clark, R. Exel, E. Pardo, A Generalized uniqueness theorem and the graded ideal structure of Steinberg algebras (2017), *Forum Mathematicum* (DOI: <https://doi.org/10.1515/forum-2016-0197>).
10. A. J. Calderón Martín, C. Draper Fontanals y C. Martín González. Gradings on Lie triple systems related to exceptional Lie algebras. *J. Pure and Applied Algebra.* 217(4), 672--688, (2013).
11. A. J. Calderón Martín, J.M. Sánchez Delgado. Weight modules over split Lie algebras.

- Modern Phys. Letters A. 28(5), 1350008 (9 pp.), (2013).
12. A. J. Calderón Martín, J.M. Sánchez Delgado.. Split Leibniz superalgebras. Linear Algebra and its applications. 438, 4709-40725, (2013).
13. A. J. Calderón Martín. On extended graded Poisson algebras.  
Linear algebra and its applications. 439 (2013), no. 4, 879892.
14. A. J. Calderón Martín. On the structure of graded commutative algebras.  
Linear Algebra and its applications. 447(2014), 110-118.
15. A. J. Calderón Martín. Graded triangular algebras.  
Electronic J. of Linear algebra. 27 (2014), 317-331.
16. A. J. Calderón Martín. Lie algebras with a set grading.  
Linear Algebra and its applications. 452(2014), 7-20.
17. A. J. Calderón Martín, C. Draper Fontanals C. Martín González Y J.M. Sanchez Delgado. Gradings and symmetries on Heisenberg type algebras. Linear algebra and its applications. 458(2014), 463-502.
18. A. J. Calderón Martín, J.M. Sánchez Delgado. On the structure of split involutive Lie algebras.  
Rocky Mountain Journal of Mathematics. 44, n.4, (2014), 1445-1455.
19. A. J. Calderón Martín. Associative algebras admitting a quasi-multiplicative basis.  
Algebras and Representation Theory. 17, n.6, (2014), 1889-1900.
20. A. J. Calderón Martín, J.M. Sánchez Delgado. On the Structure of Graded Leibniz Algebras.  
Algebra Colloquium. 22:1 (2015), 83-96.
21. A. J. Calderón, A. Diaz, M. Haralampidou, J.M. Sánchez. Graded pseudo  $\mathcal{H}\mathcal{S}$ -rings. Banach J. of Mathematical Analysis. 9(2) (2015), 311-321.
22. M.J. Aragón Perriñán, A.J. Calderón Martín. Split regular Hom-Lie algebras.

- Journal of Lie Theory. 25(3) (2015), 875-888.
23. A. J. Calderón Martín. (Anti)Commutative algebras with a multiplicative basis.  
Bulletin Australian Mathematical Society. 91(2) (2015), 211-218.
24. A. J. Calderón Martín. A second Wedderburn type theorem for some classes of linearly structured matrices.  
Linear Algebra and its Applications. 481 (2015) 249-262.
25. A. J. Calderón Martín. On the structure of graded Lie triple systems.  
  
Bulletin Korean Mathematical Society. 53(1), (2016), 163-180.
26. A. J. Calderón Martín, Luisa Camacho and B. Omirov. Leibniz algebras of Heisenberg type.  
J. Algebra . 452, (2016), 427-447.
27. A. J. Calderón Martín, F. J. Navarro Izquierdo. Arbitrary algebras with a multiplicative basis.  
Linear Algebra and its Applications. 498, (2016), 106-116
28. A. J. Calderón Martín, Hani and Hegazi. The classification of  $N$ -dimensional non-Lie Malcev algebras with  $(N-4)$ -dimensional annihilator. Linear algebra and its Applications. 505, (2016), 32-56.
29. H. Albuquerque, E. Barreiro, A. J. Calderón, J. M. Sanchez Delgado. Split Leibniz superalgebras.  
Journal of Geometry and Physics. 110, (2016), 259-268.
30. A. J. Calderón, J. M. Sanchez Delgado. Regular split Bihom-Lie algebras. Journal of Geometry and Physics. 110, (2016), 296-305.
31. M. J. Aragón Perrián, A. J. Calderón Martín. The structure of regular Hom-Poisson algebras. Colloquium Mathematicum. 498, (2016), 106-116.
32. A. J. Calderón Martín. Graded extended Lie-type algebras.  
Comm. Algebra . 45 (2017), no. 2, 866-877.
33. A. J. Calderón Martín, F. J. Navarro Izquierdo, J. M. Sanchez Delgado. Modules over linear spaces admitting

- a multiplicative basis. *Linear and Multilinear algebra* . 65 (2017), no. 1, 156-165.
34. A. J. Calderón Martín. Leibniz algebras admitting a multiplicative basis. *Bulletin Malaysian Mathematical Society*. 40 (2017), no. 2, 679–695.
35. A.J. Calderón, Juana Sanchez Ortega. Split 3-Leibniz algebras. *Journal of Geometry and Physics*. 110, 116 (2017), 204-215.
36. A.J. Calderón Martín, F.J. Navarro Izquierdo, J.M. Sanchez Delgado. Arbitrary triple systems admitting a multiplicative basis. *Comm. Algebra* . 45 (2017), no. 3, 1203—1210.
37. A. J. Calderón Martín, Hani and Hegazi. A characterization of the semisimplicity of Lie-type algebras through the existence of certain linear bases. *Linear and Multilinear Algebra*. 65(9), (2017), 1781-1792.
38. A.J. Calderón Martín. A class of simple matrix algebras. *Linear Algebra and its Applications* 528 (2017), 159–170.
39. A.J. Calderón. Extended magmas and their applications. *Journal of Algebra and its Applications*. 16 (2017), no. 8, 1750150, 11 pp.
40. A. J. Calderón Martín, C. Draper, C. Martin and Dauda. Orthogonal gradings on  $\mathcal{H}^*$ -algebras. *Mediterranean J. of Mathematics*. 15 (2018), no. 1, 15:16.
41. A.J. Calderón Martín, F.J. Navarro Izquierdo, J.M. Sanchez Delgado.  $n$ -Algebras admitting a multiplicative basis. *Journal of Algebra and its Applications*. 17(2), 1850025. 11 pages 2018.
42. A. J. Calderón Martín, Hani and Hegazi. Classification of nilpotent Malcev algebras of small dimensions over arbitrary fields of characteristic not 2. *Algebras and Representation Theory*. 21-1, (2018), 19-45.
43. A. J. Calderón Martín, C. Martin and Dauda. On Groupoid Gradings. *J. Geometry and Physics*. 123 (2018), 61–70.
44. A. J. Calderón Martín. Decompositions of linear spaces induced by bilinear maps.

Linear Algebra and its Applications. 542(2018) 209-224.

45. A. J. Calderón Martín y Diouf Mame Cheikh. Poisson color algebras of arbitrary degree. Comm. Algebra. In press.

46. A. J. Calderón Martín. On split regular Hom-Lie superalgebras. J. Geometry and Physics. In press.

47. A. J. Calderón Martín y F.J. Navarro Izquierdo. Augmented ternary maps, their applications to set-graded arbitrary triple systems, and more applications. Publ. Math. Debrecen. In press.

48. A. J. Calderón Martín, F.J. Navarro. Bilinear maps and graphs.

Discrete Applied Mathematics. In press.

49. A. J. Calderón Martín, I. Kaygorodov and P. Saraiva. Decompositions of linear spaces induced by  $n$ -linear maps.

Linear and Multilinear Algebras. In press.

50. A. J. Calderón , Amir Fernandez and I. Kaygorodov. The classification of  $n$ -dimensional anticommutative algebras with  $(n-3)$ -dimensional annihilator.

Comm. in Algebra. In press.
